**TALK-THROUGH BASE (REPEATERS)**

Increased mobile to mobile coverage can be obtained with the use of a talk-through base. These can be used "on-site", from a customers premises or from a hilltop site. Prices for talk-through bases start at £1250 but the final cost depends on the features required, location of the base and method of control. Talk-through is subject to licencing approval from the Radiocommunications Agency.

**MOBILE INSTALLATION COSTS**

Typical 12v installation incl. aerial .....	£59
Typical 24v installation incl. aerial .....	£85
Typical 24v isolated installation (Pet Reg) .....	£100
Travel charge (if not carried out at our premises) .....	£30

**BASE STATION INSTALLATION COSTS**

Without a site visit it is difficult to cost a base installation. However most are between £200 and £300. We also supply base station aerial packages for DIY installation i.e. aerial + cable cut to the correct length + all connectors fitted and electrically tested + wall brackets or chimney kits + wall bolts + clamps etc. Send full details for a prompt quote.

**RADIO PROGRAMMING**

Most Motorola Hand held radios can be programmed with enhanced features such as ANI, LONE WORKER, EMERGENCY CALLING and INDIVIDUAL CALLING at additional cost.

Radio Programming (Dependant on Features) ..... FROM £20

**MPT TRUNKING**

MPT Trunking versions of the GP Professional vehicle and base radios are available. We would be happy to quote for these after discussing your requirements.

**RADIO LICENCES**

All conventional radio systems require a licence costing from £75 p.a. - we have UK and ROI application forms which we will complete on behalf of customers.

**QUANTITY & COD DISCOUNTS ARE AVAILABLE**

Prices are in UK £'s and exclude VAT and shipping. All new equipment is covered by manufacturers 12 month warranty. E&OE.
